Summary

Final-year B.Tech undergraduate in Artificial Intelligence and Data Science (8.43 CGPA). Experienced in architecting and scaling enterprise-grade systems for 4,300+ stakeholders. Strong foundation in backend development, cybersecurity, and first-principles problem-solving, committed to driving digital transformation.

Education

B.Tech. Artificial Intelligence and Data Science

M. Kumarasamy College of Engineering, Karur

Pursuing (2027)

CGPA: 8.43 / 10

Higher Secondary Certificate (Class XII)

Green Park Matric Higher Secondary School, Namakkal

2022

Percentage: 85.83%

Secondary School Leaving Certificate (Class X)

R N Oxford Matriculation School, Paundamangalam

2020

Percentage: 99.98%

Skills

Programming Languages: Python, Java, JavaScript, PHP, C, SQL, HTML, CSS

Core Competencies: Data Structures & Algorithms (DSA), System Design, Database Management Systems (DBMS), Network Security, Cybersecurity

Frameworks / Libraries: Laravel, Bootstrap, Scikit-learn, Pandas, NumPy, REST APIs

Tools & Platforms: Git, GitHub, VS Code, XAMPP, Jupyter Notebook, IBM SPSS

Experience

Full-Stack Developer, Technology Innovation Hub

2025–2026

- Architected and engineered a 0-to-1 ERP system for college administration, leading a team of 11 developers to deliver high-availability modules currently impacting 4,300+ stakeholders.
- Optimized data integrity by designing a normalized MySQL schema from scratch, reducing query latency, and ensuring high-concurrency performance for 4,300+ users.
- Engineered a granular 8-tier Role-Based Access Control (RBAC) system with secure CRUD operations, automating complex workflows for diverse user groups from students to administration.

Projects

PalmEra – IoT Farming Platform | IoT | Cloud | Microcontrollers | Mobile

January 2026 – May 2026

- Architected a sensor-to-cloud pipeline for real-time IoT data streams, integrating soil and climate metrics into a monitoring dashboard for agricultural optimization.
- Designed a mobile application that converts simulated soil and climate readings into actionable irrigation advisories for oil palm cultivators.
- GitHub: <https://github.com/Poojavadivel/Palmera>

Discipline Management System PHP | MySQL | Bootstrap | JavaScript

October 2025 – December 2025

- Optimized misconduct tracking by building a high-availability PHP/MySQL system, implementing 8-tier RBAC, and tuning database performance for high-concurrency environments to ensure real-time, scalable data access.
- Eliminated cross-role data blindness by giving 8 role types (from student to principal) real-time case visibility, replacing a system where records existed only on paper and no staff could monitor status institution-wide.
- GitHub: <https://github.com/priyankapaneer/Discipline-Management-System>

Certifications

- Fortinet NSE 4 (Network Security Expert): Proficient in network security, infrastructure, and core security fundamentals
- IBM CEP Business Intelligence Certification
- IBM CEP Predictive Modelling Analytics
- IBM CEP Scala Fundamentals

Co-Curricular Activities

- HAIL 2026 - HEXAWARE (Advanced to Round 3)
- Flipkart Gridlock 2.0 (Advanced to Round 2)
- Hackathon – Kongu Engineering College
- AICARE 2025 | IEEE Conference
- Nimirthu Nil Participant (2025 - 2026)
